Summary

Passionate and results-driven Full Stack Web Developer with 3+ years of experience in building custom, responsive websites and web applications. Specializing in frontend development using HTML, CSS, JavaScript, React, and Tailwind CSS, with a solid understanding of backend technologies like Node.js and APIs. Proven track record of delivering high-quality, secure, and user-friendly websites for startups, freelancers, and businesses. Adept at UI/UX design, SEO optimization, and client communication. Strong problem-solving skills, a keen eye for design, and a commitment to continuous learning. Ready to contribute my expertise in creating innovative web solutions for any project.

Work experience

Independent Developer

2022 - Present

Key Achievements:

- Built and sold custom website templates and UI kits to freelance clients and small businesses, focusing on e-commerce and corporate themes.
- Employed SEO best practices in all projects, boosting organic traffic by 20-30% for clients.
- Worked independently to solve complex coding challenges, ensuring all websites were optimized for performance, accessibility, and cross-browser compatibility.

Founder & Developer

2022 - Present

Key Achievements:

- Developed and maintained a personal portfolio website, showcasing skills, projects, and achievements with a modern design and interactive features.
- Created a secure banking website template featuring login systems, dashboard designs, and payment integrations, optimized for fast load times and excellent user experience.
- Enhanced UI/UX of websites through extensive research, client feedback, and usability testing, resulting in high user retention rates.
- Continuously updated websites with new technologies, tools, and design trends to stay competitive in the field.

Freelance Web Developer

2022 - present

Key Achievements:

- Designed and developed multiple custom websites for clients, focusing on responsive design and clean UI/UX using HTML, CSS, JavaScript, React, and Tailwind CSS.
- Built a banking website template, which includes secure layouts and a mobile-first design, ready for fintech startups or personal use.
- Delivered a developer portfolio website with smooth animations and an interactive UI, showcasing personal projects and skills, leading to increased visibility.
- Managed project timelines, communicated directly with clients, and delivered all projects on time, ensuring a 100% client satisfaction rate.

Education

Bachelor of Science in Computer Science (BSCS)

2022 - 2026

SZABIST Karachi Campus

Objective

An entrepreneurial-minded and adaptable individual seeking a full-time position to further develop leadership skills and expand technical knowledge. With a background in Computer Science and a natural curiosity for solving analytical problems, I aim to tackle challenges creatively. My ideal role would offer the opportunity to continuously learn, contribute to individual projects, and experience variety in daily tasks.

Skills

HTML5

Building the structure of web pages using semantic, accessible markup.

CSS3

Styling web pages with modern layout techniques like Flexbox, Grid, and animations.

React.js

Creating fast, scalable, and user-friendly web applications with a component-based architecture.

Tailwind CSS

Using utility-first CSS framework to build custom designs quickly and efficiently.

Node.js

Building backend services and APIs with JavaScript using an event-driven, non-blocking I/O model.

Bootstrap

Developing responsive, mobile-first web pages with a grid system and pre-designed components.

Git/GitHub

- Studying a comprehensive curriculum in Computer Science, focusing on Software Engineering, Data Structures, and Web Development.
- Actively involved in practical projects, including building websites and applications.

Intermediate (ICS)

2020 - 2022

Cadet College Jhang

- Specialized in Computer Science and gained solid foundational knowledge in programming, algorithms, and computing principles.

Matriculation

2018 - 2020

Sedna School and College, Aliabad, Hunza

- Completed Matriculation in Science with a strong base in Mathematics and Physics, laying the groundwork for further studies in Computer Science.

Projects

AI-powered Web App

Description: Developed a web application that integrates AI algorithms to offer personalized recommendations based on user preferences.

Technologies: React.js, Node.js, Machine Learning

Banking Website

Description: Developed a fully functional banking website with features like user authentication, account management, and transaction history. Focused on security and user experience.

Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB

Portfolio Website

Description: Created a personal portfolio showcasing skills in web development, UI/UX design, and AI technologies. Includes an interactive contact form and project display sections.

Technologies: React.js, Tailwind CSS, JavaScript, Figma

AI-based Chatbot

- **Description:** Built an AI-driven chatbot for a customer service application. The bot answers FAQs, processes requests, and continuously learns from user interactions.
- **Technologies:** Python, TensorFlow, Natural Language Processing (NLP)

Managing code versions, collaborating on projects, and deploying code to production.

MySQL/MongoDB

Designing and managing databases for storing and retrieving data in both relational (MySQL) and NoSQL (MongoDB) formats.

Hobbies and Interests

- AI Research & Development
- Tech Community Involvement
- Football
- Problem-Solving
- Coding/Programming

Skills

Analytical Thinking

Skilled in breaking down complex problems, analyzing data, and making data-driven decisions.

Creativity

Strong ability to come up with innovative solutions and design unique, user-centric web applications.

Leadership

Ability to guide teams, take initiative, and make decisions that drive project success.

Adaptability

Quick to adjust to new technologies, environments, and challenges in fast-paced settings.
